

# Social Story:

Be careful what you share online.

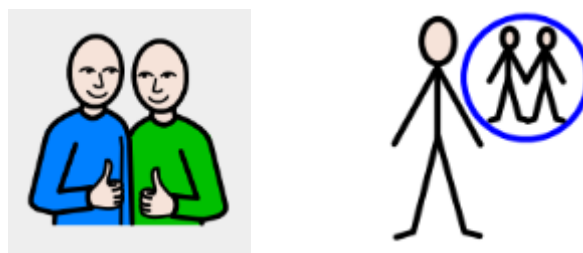

Before I share any information about myself I should think about who might see it.

Personal information can be video's, photos but also my name, age and where I live or what I enjoy doing.

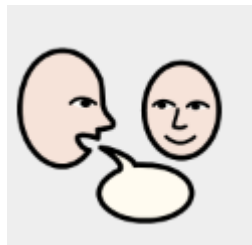

It is safest to only share my personal information with family and friends who I know in real life.

If someone I don't know in real life asks me to share my personal information, like a photo or video or asks me to go on camera this is what I will do;

1. Not reply
2. Tell an adult I trust.

If I am worried about something I have shared online or sent to someone I will ask an adult I trust for help.

Whatever has happened, it's not my fault. I will get help by telling an adult I trust, like a teacher or a family member who will keep me safe.
