

Dear Parents,

We certainly are having some wild and windy weather at the moment. I'm sure that you will all agree with me that Summer can not get here soon enough. It has come to my attention that there are quite a few parents having disputes with each other out in the community. Obviously these cases are very unfortunate and can be distressing for the children. I would like to draw your focus back to our **Rights Based Values** here at Star. We have all been through a lot together over the past year and it is understandable that tensions can run high. However mutual respect and tolerance is a key feature of our Star community. In a year when some of our community have lost so much, and others have sacrificed so much, I appeal to you all to be even kinder and put differences aside.

I am delighted to share with you that after much delay, we have today announced our Year 6 prefects. I am very proud of each and every one of them. Have a lovely weekend. Best wishes
Ms Von

Disruption Ahead

As some of you may remember, we had a heating systems failure in January and had to have some extensive work done in the lower hall and bottom floor classrooms. Unfortunately, we now need to replace the entire heating system in the school. This work is scheduled to take place over the summer holidays but I have been informed that the engineers will need complete access to the top floor two weeks before the holidays. This will cause major disruptions to all top floor classes. We have worked very hard on a plan to rehouse all classes to a suitable location and build the last two weeks around these disruptions. I will keep parents informed and be sending out detailed plans after the Half Term break. I will do my very best to keep all classes in school as I know that children have had a very disrupted year. Thank you very much for your support in this matter.

Design and Technology Day!

This week year 5 dedicated a whole day to creating a Viking weapon! The children researched, planned, designed and created a Viking Catapult using wooden blocks, an elastic band and a bottle cap! The children had the amazing opportunity to use a saw and a hot glue gun to create their masterpieces. One year 5 child stated "We enjoyed the experience of building the catapult and working together to complete the project", while another commented that "We really enjoyed firing the Catapult and creating a video to evaluate our project". Overall, the children had a fun filled day where they acquired a range of D&T skills!
